The AMP2009 follows the successful 1st International Symposium on Antimicrobial Peptides organized in Nantes (France) in June 2006.

The AMP2009 Symposium will present an up-date on scientific knowledge in different areas of antimicrobial peptides research. The AMP2009 Symposium will feature a wide range of topics, such as peptide design and structure, mechanisms involved in activities and resistance, anti-Gram negative, anti-fungi and anti-virus peptides, clinical and food applications, industrial production. Speakers and participant develop research on antimicrobial peptides in the field of biochemistry, molecular and structural biology, microbiology, eukaryote biology, medical pharmaceutical, veterinary and food sciences.

The Scientific Committee cordially invites you to submit contributions to AMP2009 and encourages juniors scientists and graduate students to present their recent work. Participation to AMP2009 is a good opportunity to exchange with scientific leaders in the field and to initiate cross-disciplinary collaborations.

AMP2009 participants could submit original research article or timely review to be published in a special issue of ***Probiotic and Antimicrobial Proteins***, a new international journal launched by Springer-USA (www.springer.com/12602).
